FRANGISOLE IN COTTO TERRACOTTA BRISE SOLEIL

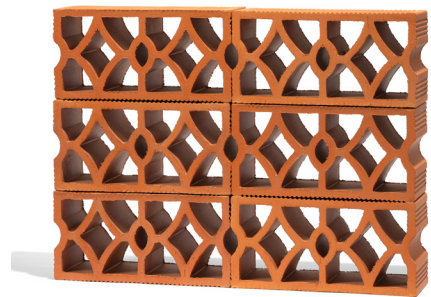

I **Frangisole** in terracotta, realizzati in diverse geometrie, permettono di creare murature leggere e dinamiche. Le tonalità naturali del cotto offrono libertà progettuale valorizzando ogni tipo di architettura.

Questi elementi, oltre a limitare la visione, generano raffinati giochi di luce ed ombre e, riducendo l'irraggiamento solare, migliorano comfort e qualità degli spazi adiacenti.

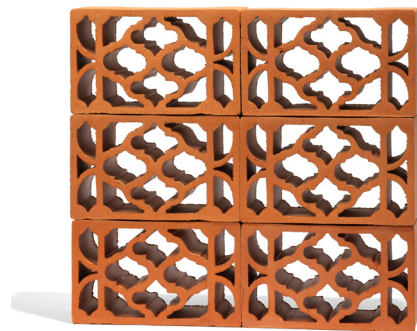

Terracotta brise soleil elements, available in different geometries, allow the creation of light and dynamic wall compositions.

The natural tones of terracotta offer design flexibility and enhance every type of architecture.

These modular elements not only provide visual screening but also create refined light and shadow effects and, by reducing solar radiation, improve the comfort and quality of adjacent spaces.
